SUMMARY

Full-stack developer specializing in **React, TypeScript, and Node.js**, building and maintaining a **production loan management platform in fintech**. Contribute to CRM module development and a platform-wide **Angular-to-React migration**, with growing focus on infrastructure and monitoring as part of a broader **full-stack + DevOps** skill set.

SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, shadcn/ui, MUI, React Query, Zustand, Responsive Design

Backend: Node.js, Express.js, REST API Design, JWT Authentication, OAuth, Role-Based Access Control (RBAC), Redis

Database: MongoDB, PostgreSQL

DevOps: AWS (EC2), DigitalOcean, Docker, Grafana, Prometheus, server deployment and lifecycle management

AI-Assisted Development: Prompt engineering and AI-assisted coding/debugging workflows for faster iteration and code review

WORK EXPERIENCE

Junior Software Engineer, Full-Stack — Statlight Software Solutions

Jun 2025 – Present

- Own core module development within a team-wide migration of the company's CRM/LMS platform from Angular 9 to React 18, building UI components across dashboards, forms, and workflow screens, including a canvas-style template editor.
- Own end-to-end redesign, performance optimization, and maintenance of the chat application, including its Twilio-based communication component.
- Fixed a chat performance issue causing the interface to lag under heavy message activity — identified the cause as unnecessary re-rendering on every incoming message, and reworked how the chat fetched and updated data to keep it responsive at scale.
- Redesigned how chat integrates with the CRM — replacing a tightly-coupled embed that required manual wiring between the two systems with a self-contained, plug-and-play widget, removing that integration overhead for other teams.
- Built and maintained Node.js/Express APIs and MongoDB/Mongoose schemas for authentication, access control, workflow records, and application data.
- Set up monitoring for the SMS and chat servers to track application and server health — first hands-on step into infrastructure work.

Technical Trainer & Freelance Developer — a1ideaz

Oct 2024 – Feb 2025

- Trained students in JavaScript and full-stack fundamentals (CRUD apps, auth flows, REST APIs) and took on freelance development for external B2B clients.

PROJECTS

html-formeditor (Open Source) — React.js, TypeScript, shadcn/ui. Built a canvas-style visual editor for creating and exporting production-ready HTML email/document templates, removing third-party dependencies.

AccessVault — React.js, Node.js, MongoDB, JWT. Role-based credential management app with audit logging; used personally for storing environment and credential files.

CERTIFICATIONS

- AWS Cloud Practitioner — In Progress (Udemy)
- AWS Fundamentals — Completed (College)
- Responsive Web Design — freeCodeCamp

EDUCATION

B.E., Computer Science and Engineering

E.G.S. Pillay Engineering College, Nagapattinam

Oct 2020 – Jun 2024

GPA: 8.0 / 10
